Our main product at **48.2%** (FYE June 2025) of Revenue

PCI (Percutaneous Coronary Intervention)-1

- Therapy for coronary artery disorder (angina, myocardial infarction)
- Recover the blood flow after dilatation of stenosed lesion
- Treatment through femoral or radial artery without laparotomy and thoracotomy to minimize the mental and physical burden on patients.

Surgical Therapy

Bypass Operation

Interventional Therapy

Minimally Invasive Treatment (PCI Treatment)

PCI (Percutaneous Coronary Intervention) -2

Essential Devices of PCI Treatment (Three Sacred Treasures)

3 Devices Essential for PCI Treatment

Guiding Catheters

Guide Wires

Balloon Catheters

PCI (Percutaneous Coronary Intervention)-3

For PCI treatment to be successful, the PCI guidewire must reach the affected area

① PCI GW Advancement

Small size tube called PCI Guiding Catheter inserted in blood vessel. Advance PCI GW inside of this tube.

② PCI Balloon Catheter Tracking

Along with PCI GW, PCI Balloon Catheter trucked over PCI GW to the point of the narrowed portion of vessel.

③ PCI Balloon Catheter dilatation

Dilate Balloon, then enlarge the blood vessel.

④ PCI Balloon Catheter pulled out

After Narrow portion enlarged then blood flow to recover.

PCI (Percutaneous Coronary Intervention)-4

Comparatively easy lesions

Lesions with high difficulty

Advantage of Our PCI Guide Wire

High transmissibility of rotation(Torquability)

Tip flexibility(Safe operation)

Doctors manipulate the wire and try to transfer the feeling of finger tip to the distal end of wire.

Source of competitiveness: 4 core technologies

Control of hardness and diameter

Wire drawing technology

Wire forming technology

Micron-level molding

Rotation following capacity

Torque technology

Resin coating technology

Ultra-thin film coating

Integrated production system
handling materials down to
the finished products

Our Company's Flagship CTO Treatment

Implementation of PCI Treatment in CTO Cases

■ What is CTO ? (Chronic Total Occlusion)

- A disease of hard calcification
- Completely clogged up blood vessel

【 Level of heart disease 】

Healthy person → Risk holder

Lifestyle-related diseases

Cardiovascular occlusion

CTO

(Chronic Total Occlusion)

Latent patient

Previously realm of surgical operations

In the era when the Japanese market depended on imports for PCI GW, Japanese KOL requested major manufacturers to make a wire for CTO PCI but were turned down.

※KOL(Key Opinion Leader)・・・A physician with influence over the direction of PCI.

PCI GW for CTO Procedures (1995)

Aggressive expansion of CTO cases via minimally invasive procedures
